

Whistleblowing System

POSSEHL Identification Solutions (PID) as a member of POSSEHL SME Investments offers the possibility to contact an internal, outsourced and independent whistleblower portal in case of suspicion or knowledge of illegal or unethical actions and thus to contribute to the detection of violations of rules.

It is possible to report misconduct by employees in our group of companies as well as by our suppliers and service providers with regard to possible violations of the law or actions that are harmful to the company, such as corruption, bribery, fraud, other criminal offences, child labour, slavery, lack of occupational safety, exploitation and discrimination.

Whistleblowers will not suffer any disadvantage as a result of making a report. Reports can be made in German and English. Reports can also be made anonymously if desired.
